Perfect Corset-Comfort and Up-to-Date Style for SLENDER WOMEN

NEMO LASTIKOPS CORSET, NO.
330. THE LATEST CORSET IN-
VENTION.

\$3.50

As great a godsend to slender women as the world-famous Nemo Self-Reducing Corset is to stout women.

The two bands of semi-elastic Lastikops Webbing (see cut) firmly but gently support the abdomen and internal organs, preventing that dangerous "bearing down" feeling, no matter how tight you lace. Every woman knows what that means. Don't fail to see this new corset. It's an entire novelty—nothing like it ever made before. This very latest Nemo patented invention.

Of fine white coutil, high bust, long skirt, Lastikops Hose Supporters; sizes 18 to 26—\$3.50

LAST & THOMAS

PASSENGERS TO IDENTIFY ROBBER

To identify, if possible, Robert Lanier, charged with complicity in the robbery of the Oregon Short Line train near Ogden, passengers will be taken to the county jail in Salt Lake City. Chief Special Agent J. Jones of the Oregon Short Line, who has been working on the train robbery case, will take a number of passengers from Ogden. Lanier was arrested in Butte.

A number of the passengers who reside in Salt Lake City visited the county jail Thursday afternoon in an effort to identify Lanier, but he was not brought before them, owing to the fact that it has been arranged for all the passengers to see him today. Lanier does not deny that he was on the train on the night of the robbery, but he maintains that he was a passenger and that he did not leave the smoking car until after the robbery. He is known, however, to have left Salt Lake City with a shotgun similar to that used by the robbers, and this fact, with other evidence gathered by Jones and his men, will be used against Lanier.

Those passengers who saw Lanier on Thursday afternoon, although they did not see the prisoner plainly, due to the fact that he was wearing the corridor of the jail, said that he did not answer the description of either of the train robbers.

MAN HAS COFFIN MADE TO ORDER

Millan, Mo., Sept. 9.—George Brandon, who lives near here, believes he was cheated on two occasions when he bought coffins from undertakers for members of his family, so he is having a carpenter make him a casket for himself to order.

Mr. Brandon came here yesterday climbed into the coffin and expressed himself as satisfied with the fit of it.

Although Brandon is now in perfect health, he desires to run no chances of his estate being bilked in the purchase of a casket after he is dead.

SHORTEST WILL ON RECORD IN CONNECTICUT

Hartford, Conn., Sept. 9.—The shortest will on record in Connecticut has just been filed in the surrogate's office at South Manchester, Conn. It contains exactly sixteen words, leaving the \$50,000 estate of the late Knight D. Cheney, Jr., to his wife.

The will is as follows: "I give and devise all of my property, real and personal, to my wife, Ruth Lambert Cheney."

CANADIAN NORTHERN WANTS A RIGHT-OF-WAY

Vancouver, B. C., Sept. 9.—Application was made before the Canadian board of railway commissioners yesterday by the Canadian Northern railway for an order empowering them to occupy the right-of-way of

SALT LAKE AND STATE NEWS

NEW HOSPITAL OPENS IN SALT LAKE CITY

SALT LAKE, Sept. 8.—Another large modern hospital will be added to the list already in Salt Lake when on Saturday the Judge Mercy hospital, Eleventh East and Seventh South streets, will open its doors. It will be conducted under the supervision of the Sisters of Mercy, Mother Mary Vincent to be the superintendent in charge.

In conjunction with the hospital will be a training school for nurses under the direction of Chief Nurse Mrs. N. F. W. Crossland. Other nurses in the regular service will be Miss Hester Thomas, Miss Edith Kienneberger, Miss Nora Shirk and Miss Vera Schlenker. Dr. S. H. Pinkerton will be the medical director.

The first floor of the new hospital, which was originally designed as a miners' home, will contain two suites, each comprising a sitting room, bed room and bath room; two rooms each with adjoining private bath, and 10 other private rooms. Every room will be fitted with brass beds and mission furniture. On the first floor also will be the main offices, the pharmacy and the diet kitchen.

The second floor will not be opened Saturday, the only rooms to be occupied there for the present being the two suites to be used by the Very Rev. Dean Harris, chaplain of the hospital, and Dr. S. G. Paul, resident physician.

Short Line Quarters.

The third floor will be occupied by the Oregon Short Line company's department and by the nurses' quarters. The Short Line department will accommodate 50 patients in rooms containing from two to five beds.

The operating rooms, sisters' quarters, chapel, X-ray room and specialists' departments and two maternity rooms will be on the fourth floor. The operating tables and all the fixtures in the operating rooms are nickel plated everything except the fixtures being white, the walls, for six feet up, white enamel.

The chapel, designed primarily for the sisters, will accommodate, however, about 200, and will be open to all who care to attend. It is situated in one of the most picturesque parts of the city, the Judge Mercy hospital is an ideal place for the invalid. Any reputable physician may take his patients there and care for them himself.

SALT LAKE TURNS A LEPER LOOSE

SALT LAKE, Sept. 8.—John Kokas, a leper, is a passenger on an east-bound train with New York city as his objective point and his former home in Greece as his destination. Kokas wears no yellow flag or other mark of identification save the telltale marks of the terrible disease upon his skin.

His departure from Salt Lake City last night was taken with the most secrecy. Provided with a purse by friends who were anxious to escape the responsibility of caring for him, he departed from the tent in which he had been quarantined and became one of the crowd of eastbound tourists that moves through Salt Lake at this season of the year.

Beyond the fact that he has gone and seeks an asylum in his native land, little is known. The railroad on which he took passage has not been disclosed. Since the diagnosis of his disease three months ago, Kokas has been an elephant on the hands of the authorities. The city attempted to interest the county in the case; the county refused to admit liability; the immigration authorities could find no law under which he could be deported, and he was finally placed in quarantine in a tent where he was maintained at the cost of his friends. When the case was first observed it had not reached the infectious stage and Kokas was allowed considerable freedom on that account. Subsequently the disease made rapid progress and exposure at this time may not be without danger.

MANY ACRES OF COAL LAND WITHDRAWN

Notice was received at the United States land office Thursday of the withdrawal of 267,350 acres of coal land in Morgan, Summit and Rich

counties. All lands found to contain coal will be classified under the coal laws, while the remainder will go to the public domain as agricultural land. The withdrawal includes nine townships, as follows: Townships 5 and 6 north, range 4 east; townships 4, 5, 6 and 7 north, range 5 east; townships 5, 6 and 7 north, range 6 east.

Notice of the reclassification of coal lands in township 39, range 6 west, Salt Lake meridian, in Kane county, was also received at the local land office Thursday. Parts of the sections selected are found to contain no coal, but those portions which contain coal have been increased in price to \$15 per acre on account of their lying within fifteen miles of a railroad. About half of the township is found to be non-coal land.

HUNTING A JOB, MAN LOSES HIS LEG

SALT LAKE, Sept. 8.—C. W. Schultz, who rooms at 114 East Second South street, is at the Dr. Groves L. D. S. hospital with both legs badly crushed, as the result of an attempt to climb aboard a switch engine operated by the Inland Crystal Salt company near its plant early this morning.

His injuries may result in his losing both limbs, but it is thought he is strong enough to stand any operation. Schultz had been out of employment for some time and he tried to catch a Salt Lake train this morning to go to the plant of the salt company. When he arrived at the salt pond he got off the train and in attempting to climb aboard the switch engine that operated from there to the works he missed his footing and fell under the wheels.

A special train was hurriedly made up and a record trip made to the city. He was taken to the hospital and an examination showed his limbs to be badly crushed.

GREEN RIVER LAND WILL BE RECLAIMED

Five Million Dollars to Be Expended by New Irrigation Company.

SALT LAKE, Sept. 9.—Another immense irrigation project in the Green River country has been launched. The state land board Thursday granted the application of the Green River Irrigation company for the temporary segregation of upwards of 165,000 acres of arid lands on either side of the Green river, in Grand county.

The company proposed to obtain water by building a diverting dam twenty or thirty miles up the Green river from its first upper crossing and carrying the water by gravity ditches and flumes down either side of the stream to the land. At the pipe line on the west will cross the San Rafael river and at the crossing point a pumping plant will be erected to irrigate land that otherwise never would be reclaimed, it is contended.

The company proposed to spend something like \$5,000,000 to put water on the land. It is asserted, \$200,000 of which already has been expended in making preliminary surveys and in like and at this time there are several engineers in the field. The company, under the withdrawal agreement entered into Thursday, must appear before the land board every three months and show what progress is being made.

GOOD SPRINGS IS LARGE PRODUCER

Lead, Zinc and Copper Mines of Southern Camp Are Shipping.

The Prairie Flower mine, in Good Springs district, is opening even larger than its famous neighbor, the Yellow Pine, extent of development considered, according to J. B. Jensen, who is in the city from camp. The Prairie Flower, which is being operated by Jesse Knight, nephew of the Provo wizard, has a body of solid galena ore six feet thick, of unknown lateral dimensions. From the property at this time is being shipped a carload a week of ore which carries 60 per cent and 70 per cent lead.

Operations at the Yellow Pine mine have been slowed down pending the completion of the company's railroad and mill, but it is expected that within the next 60 days a large force of men will be employed breaking the immense bodies of zinc and lead ore which are in readiness to be mined. The Potosi mine is making its regular production of about 30 tons of high grade ore monthly and is likewise making some lead shipments. Riley and associates, of Las Vegas, are shipping three and four carloads of ore a month from a new property which they are opening.

From the Addison and Milford mines, which were taken over some months ago by J. Will Knight and Lafayette Holbrook of Provo, regular

shipments are being made to the Needles smelter. The Addison is producing lead ore and the Milford is at this time turning out zinc ore. Both are understood to be opening in excellent form.

The camp as a whole never looked better, Mr. Jensen says. Ore in large quantities is opened, apparently, wherever work is done, the possibilities of the district being the greatest of any of which he has knowledge at this time.

In the property of the Ninety-nine Copper company, of which Mr. Jensen is manager, operations the last few months have been centered upon gaining depth upon the ore bodies which had been previously opened. Drifting on the 300-foot level is now in progress. The company has on the market a shipment of ore which was taken out in doing development work above that level.

NEVADA DESERT NOT PROMISING FOR SHEEP

Conditions on Winter Range Reported to Be in Exceedingly Poor Condition.

SALT LAKE, Sept. 9.—V. M. Pratt has just returned from a somewhat extended visit at Caliao, Utah, and vicinity. While out in that region he spent considerable time on the Great American desert, making observations as to conditions there. He says that the outlook for winter sheep grazing on the desert is extremely bad. Notwithstanding the fact that heretofore many flocks were taken on the desert from Idaho and Wyoming, as well as from other localities in Utah, to winter, the prospect is that no such sheep exodus will occur this year.

Mr. Pratt says that the extremely dry season has left the range in an impoverished condition, denuded of vegetation and giving to the desert the appearance of a fire-swept plain. It is reported by flockmasters, he says, that not in twenty years has the outlook been so uninviting to the sheep man. Already hundreds of sheep have died, and there is grave apprehension that further great losses will be sustained.

In addition to the fact that the flockmasters will be obliged to resort to feeding this winter, the situation is rendered the more difficult by the circumstance that no feed can be purchased anywhere within reasonable range of the desert and its herds. All in all, says Mr. Pratt, the prospect is drear, indeed.

WILD HORSE HAS NEW OPERATIONS

Three Companies at Work in Interesting Seven Townships.

With three companies working in Wild Horse country, Seven Townships district, revival of interest in a portion of the district which in earlier days attracted a great deal of favorable attention is promised. The companies conducting operations there are the Providence Extension Gold Mining company, Fresno Development company and the Wild Bull company.

The Providence Extension company has begun sinking a new shaft in its property, which is at the head of the canyon, upon what is known locally as the upper belt or vein system of the district. M. J. Whelan, superintendent of the operations, says that the new shaft will in all probability, as shown by surveys and measurements, cut the northernly extension of one of the Mazuma Hills veins, and that all of those veins may be reached with relatively little lateral work. The ground prospects well and gives every indication of the presence of a mine with development.

The Wild Bull company's property is at the opposite end of the canyon, in about the middle of the lower vein system. That company has installed a pumping plant and is unwatering its workings, with the intention of sinking the shaft deeper and doing extensive lateral work.

Between the Wild Bull and Providence Extension properties is the group of claims of the Fresno Development company, which is said to be doing good work. At least one other company is expected to resume operations in the canyon within one month.

UNDERWRITERS WILL DEMAND LEGISLATION

SALT LAKE, Sept. 9.—The Fire Underwriters' association of Salt Lake will be among an active legislative campaign against certain abuses in the insurance business said to exist now in the state. This was to have been the principal topic of discussion at the regular monthly meeting Thursday noon at the Commercial club. Because of the absence of a number of members of the association, the discussion of this important matter was postponed until Tuesday, when a special meeting will be held.

The meeting Thursday noon was the first following the summer vacation and a number of prominent members of the association were not in attendance, and as a result several

other matters, in addition to the legislative campaign proposition, went over until the special meeting.

It is likely that certain amendments to the now existing insurance laws of the state will be asked for. The system of "overhead" writing will come in for a thorough investigation. Where outside firms persist in writing fire insurance, while not licensed to do business in the state, it will be urged that stringent measures be taken against them. The local agents maintain that the people insuring with these outside firms have no protection whatever in case of loss by fire, if the outside firms are disposed to dispute the fire loss claims.

BOTH LEGS CRUSHED BY RAILROAD SWITCH ENGINE

SALT LAKE, Sept. 9.—By jumping in front of a moving switch engine near Saltair, C. W. Schultz, 114 East Second South street, suffered the serious crushing of both legs Thursday morning. Schultz was taken to the Groves L. D. S. hospital and placed on the operating table. According to the surgeons, he will recover. Schultz, while attempting to jump from the switch engine of the Inland Crystal Salt company near the works at Saltair, leaped in front of the engine and was run over. Schultz had left this city early Thursday morning for the plant of the salt company, expecting to go to work. Upon arriving at the salt pond he boarded the switch engine, which was to go to the plant, two miles westward.

BIG FIGHT STIRS UP THE DELEGATES

ST. PAUL, Minn., Sept. 8.—The committee on resolutions of the National Conservation congress was in turmoil or verging on it all day today. Eventually the committee agreed to recommend a night session of the convention and a platform demanding national control of natural resources. The big fight of the committee meeting, which it was promised would be carried to the floor of the convention at the highest session, concerned the mention of the name of Theodore Roosevelt as the originator of the policies recommended by the committee and ignoring that of Mr. Taft.

The sessions of the committee were executive, but reports of the warfare leaked out. Violent speeches were made demanding that the policies advocated by the congress not only were those of Mr. Roosevelt, but that the name of the latter should be specifically mentioned.

This occurred during the afternoon, when there were but eighteen members of the committee present, under the chairmanship of ex-Governor Pardee of California. The vote to include the name of President Taft was lost, 8 to 10.

ST. PAUL, Minn., Sept. 8.—The National Conservation congress tonight adopted a platform placing the seal of its approval on national control of natural resources and adjourned. A threatened fight on the present state conservation commissioners to place the name of President Taft in the platform along with that of Theodore Roosevelt as the great friend of conservation did not materialize on the floor as Roosevelt's name finally was taken out of the platform in committee.

The following were chosen as officers:

President—Henry Wallace of Des Moines, Ia.

Secretary—Thomas R. Shipp of Indianapolis, Ind.

Treasurer—D. A. Latschaw of Kansas City.

Gifford Pinchot and J. B. White of Kansas City declined to be nominated for the presidency and Mr. Pinchot was not opposed.

PEOPLE TO VOTE ON BOND ISSUE

SACRAMENTO, Cal., Sept. 8.—The constitutional amendments for the purpose of raising \$10,000,000 for the Panama-Pacific International exposition at San Francisco in 1915, to celebrate the opening of the Panama canal, were passed late this afternoon by the legislature in special session, and will be submitted to the people in the coming election in November. One measure provides for a special state tax to raise \$5,000,000, and the other amends the charter of San Francisco to permit the city to issue \$5,000,000 bonds for expediting purposes.

With \$7,000,000 already subscribed toward the exposition, California will

Go before congress at the coming session with \$17,500,000 for the world's fair in 1915 if the people of the state vote the \$10,000,000 in November, which is regarded as a certainty.

COLONEL MERRITT DEAD.
SALT LAKE CITY, Utah, Sept. 8.—Colonel Samuel A. Merritt died here today. He was born in Virginia 83 years ago. In 1849 he went to California with the gold seekers and later on became a member of the California legislature. Removing to Idaho he took an active part in politics and again sat in a legislature.
By appointment of President Cleveland, Colonel Merritt was the last justice of the supreme court of the territory of Utah. After his retirement from the bench he practiced law and served for many years as Democrat in the national committee from this state. Six years ago he was injured in a street car accident and never regained his health.

VERY woman appears to the best advantage in a smart, becoming, tailored suit like this "College Girl Suit."

In such a suit as the one pictured a woman would be well dressed for the street, whether she were in Chicago, New York or Paris.

This is one of the styles produced in Paris by the head designer of Wooltex garments.

Its trim, close outline and the novel cut of the short jacket mark it as a special model for young women.

This \$32.50 Wooltex suit is typical of the remarkable values that you can always find in our suit department. Call and see the New Models.
